MWS 3™

Information

MWS 3™

Functionalities:

1. High positioned napoleon-pocket.
2. Detachable swirvel hood which follows the movements of the head. Light and easy one-hand adjustment to be inside the jacket and away when not in use.
3. Two vertical build-in front pockets with easy access. One is waterproof. Both pockets have the YKK™ waterproof zippers. Left pocket has a build-in pin on reel.
4. Totally 7 pockets each one with a specialized function: One of these plus two of the side positioned pockets with opening to the rear (hand warmer) and one of the front pockets are lined with mesh. All together they serve as the air conditioning system of the jacket. Further to that three inner pockets, two positioned in breast level and one highly positioned napoleon-pocket.
5. New designed effective closing system of the wrists. Analog, elasticated adjustment. Lined with 2 mm Lycra lined Neoprene.
6. Elbow parts reinforced with Cordura.
7. Three D-rings for wading stick etc.
8. Detachable mesh-bag. The bag can be attached to the upper and the two lower positioned D-rings. The bag has many uses but foremost it is easy to carry and easy to clean!

Use:

A discrete jacket so light, comfortable and functional that you don't feel it on.

A protection against all kind of weather. A "tool" for fishing and outdoor activity. A product which reflects a user with an attitude to quality.

The jacket is designed so you can move without any restrictions.

Best possible breathability has been achieved through the single-layer-principle i.e. no double layer of membrane, as for instance a patched pocket.

This model is suitable for sedentary outdoor activities.

Material:	The System Fabric™/Cordura®
Sizes:	XS-XXXL
Colours:	Green/Grey - Brown/grey
Weight:	850 gm. (L)

Maintenance:

When the garment is wet always allow it to completely dry before storing.

Machine wash cold - 30° Celsius.

Use a damp cloth on a regular basis to remove dirt. Use a light detergent or a non-detergent soap.

Do not use a fabric softener.

Water repellency is an important factor in keeping the garment waterproof.

When necessary, restore water repellency by using a spray or wash-in product.

Follow the instructions from the manufacturer.

All technical products require proper maintenance. To ensure a long lasting product we advise you to follow the directions stated above or inside the garment.

The System Fabric™

T.S.F is an innovative material providing excellent protection from the elements. A durable and tough fabric with superior waterproofing, breathability and heat reflective capabilities.

T.S.F is the ideal third layer for all outdoor activities, except the most physically demanding activities.

T.S.F allows excess heat and moisture to evaporate without compromising waterproofing, leaving you dry and comfortable.
